# WiFi as a Service

Professional management of your WLAN IT infrastructure

**In today's world, the availability of a reliable wireless network has become a matter of course. Whether it's for employees or visitors, access to their data, emails, and websites should function smoothly and securely. Our WiFi as a Service includes the management, monitoring, and optimization of your entire WLAN IT infrastructure for one or multiple locations.**

## What we offer you

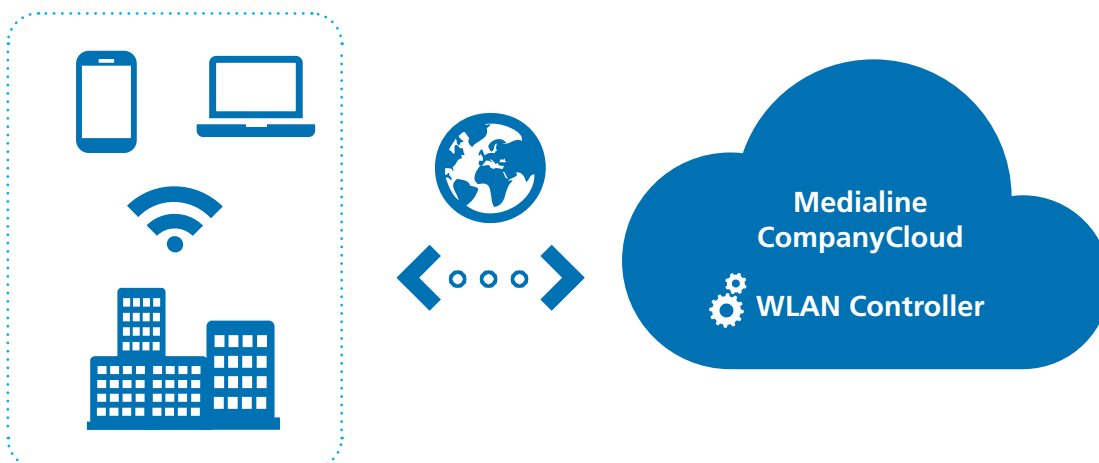

- Software-based installation and maintenance of the entire WiFi network
- Monitoring of backend components
- Provision of the WiFi network for internal employees and guests
- Individual expansion of access points
- Hardware for access points included in the monthly fee
- Variable service contract terms of one or three years
- Central voucher system including personalized portal for your WiFi guests
- Cross-location configuration
- Airtime fairness for large client environments
- Band steering for high performance
- Security through VLAN support
